## 1 QUADRATIC FORMS Q 2.68

Find the normal at the point  $\begin{pmatrix} 1 \\ 1 \end{pmatrix}$  on the curve  $2y + x^2 = 3$ .

## 2 SOLUTION

The given curve can be expressed as

$$x^2 + 2y - 3 = 0 \quad (2.0.1)$$

$$\Rightarrow \mathbf{V} = \begin{pmatrix} 1 & 0 \\ 0 & 0 \end{pmatrix}, \mathbf{u} = \begin{pmatrix} 0 \\ 1 \end{pmatrix}, \mathbf{f} = -3 \quad (2.0.2)$$

Since  $|\mathbf{V}| = 0$ , the given curve represents a parabola. The eigenvalues are given by

$$\lambda_1 = 0, \lambda_2 = 1 \quad (2.0.3)$$

with corresponding eigenvectors

$$\begin{pmatrix} 1 & 0 \\ 0 & 0 \end{pmatrix} \mathbf{x} = 0 \Rightarrow \mathbf{p}_1 = \begin{pmatrix} 0 \\ 1 \end{pmatrix} \quad (2.0.4)$$

$$\begin{pmatrix} 0 & 0 \\ 0 & -1 \end{pmatrix} \mathbf{x} = 0 \Rightarrow \mathbf{p}_2 = \begin{pmatrix} 1 \\ 0 \end{pmatrix} \quad (2.0.5)$$

To find the vertex of the parabola,

$$\begin{pmatrix} \mathbf{u}^\top + \kappa \mathbf{p}_1^\top \\ \mathbf{V} \end{pmatrix} \mathbf{c} = \begin{pmatrix} -\mathbf{f} \\ \kappa \mathbf{p}_1 - \mathbf{u} \end{pmatrix} \quad (2.0.6)$$

where,  $\kappa = \mathbf{u}^\top \mathbf{p}_1 = 1$

$$\Rightarrow \begin{pmatrix} 0 & 2 \\ 1 & 0 \\ 0 & 0 \end{pmatrix} \mathbf{c} = \begin{pmatrix} 3 \\ 0 \\ 0 \end{pmatrix} \quad (2.0.7)$$

$$\Rightarrow \mathbf{c} = \begin{pmatrix} 0 \\ 1.5 \\ 0 \end{pmatrix} \quad (2.0.8)$$

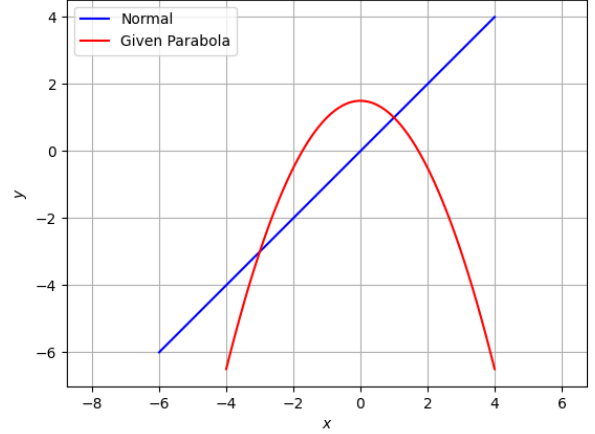

Fig. 0: Plot of the normal

Now to evaluate the direction vector  $\mathbf{m}$ ,

$$\mathbf{m}^\top (\mathbf{V} \mathbf{q} + \mathbf{u}) = 0 \quad (2.0.9)$$

$$\Rightarrow \mathbf{m}^\top \left( \begin{pmatrix} 1 & 0 \\ 0 & 0 \end{pmatrix} \begin{pmatrix} 1 \\ 1 \end{pmatrix} + \begin{pmatrix} 0 \\ 1 \end{pmatrix} \right) = 0 \quad (2.0.10)$$

$$\Rightarrow \mathbf{m}^\top \begin{pmatrix} 1 \\ 1 \end{pmatrix} = 0 \quad (2.0.11)$$

$$\Rightarrow \mathbf{m} = \begin{pmatrix} -1 \\ 1 \end{pmatrix} \quad (2.0.12)$$

The normal is obtained as

$$\mathbf{m}^\top (\mathbf{x} - \mathbf{q}) = 0 \quad (2.0.13)$$

$$\Rightarrow \begin{pmatrix} -1 & 1 \end{pmatrix} \left( \mathbf{x} - \begin{pmatrix} 1 \\ 1 \end{pmatrix} \right) = 0 \quad (2.0.14)$$

$$\Rightarrow \begin{pmatrix} -1 & 1 \end{pmatrix} \mathbf{x} = 0 \quad (2.0.15)$$

The above results are verified in Fig. ??.
